Personal homepage assignment

Create an HTML page to introduce yourself.

The purpose of this assignment is to experiment with the many HTML elements that were discussed in the course.

This document should at least contain the following sections

- Title with your name
- Personal information section
    - full name
    - address
    - phone number
    - email address
    - picture
- Hobbies
    - name, description and link to a website for each hobby (at least 3)
- Likes
    - favorite bands, music, movies
    - for each : name, small image, link to website

Be sure to use images, links, (un)ordered lists, paragraphs. Put images (and possible other media files) in separate folders.
